

# Honda Motorcycle and Scooter India Pvt. Ltd Vithalapur , Ahmedabad, Gujarat

**Presenter :**

**Pranay Tungare – Chief Manager**

**Priyank Pande – Manager**

**Dharmesh Prajapati- Sr. Executive**

HMSI – Vithalapur Plant (4F)

## 1<sup>st</sup> Factory (Haryana)

Land area : 210,000m<sup>2</sup>  
Building area : 102,000m<sup>2</sup>  
Productive capacity : 1,650,000

## 2<sup>nd</sup> Factory (Rajasthan)

Land area : 237,822m<sup>2</sup>  
Building area : 104,283m<sup>2</sup>  
Productive capacity : 1,200,000

## 3<sup>rd</sup> Factory (Karnataka)

Land area : 350,000m<sup>2</sup>  
Building area : 132,539m<sup>2</sup>  
Productive capacity : 2,400,000

## 4<sup>th</sup> Factory (Gujarat)

**Total Area** : 93 Acre ( 376,960 m<sup>2</sup>)  
**Investment** : 1,100 Crores  
**Production Capacity**: 1.2 Million Veh / Yr  
**Production Line** : 2 Main lines ( 4400/day )  
**Manpower** : 4056

- 100% Capacity Utilization of Line 1 in April'16
- Second Line Started in Jun'2016

## Operation started 18<sup>th</sup> Jan 2016

2013

HMSI president Mr Muramatsu with Hon'ble PM & the then Hon'ble CM of Gujarat Sh. Narendra Modi

Further Strengthening buss. Ties with India Japan.

2014

Land Allotment

Consent to Establish

Land Development

Construction

2015

M/c Installation

Factory Office

Factory Ready with in record timings of 13 Months

2016

Start of Commercial Production

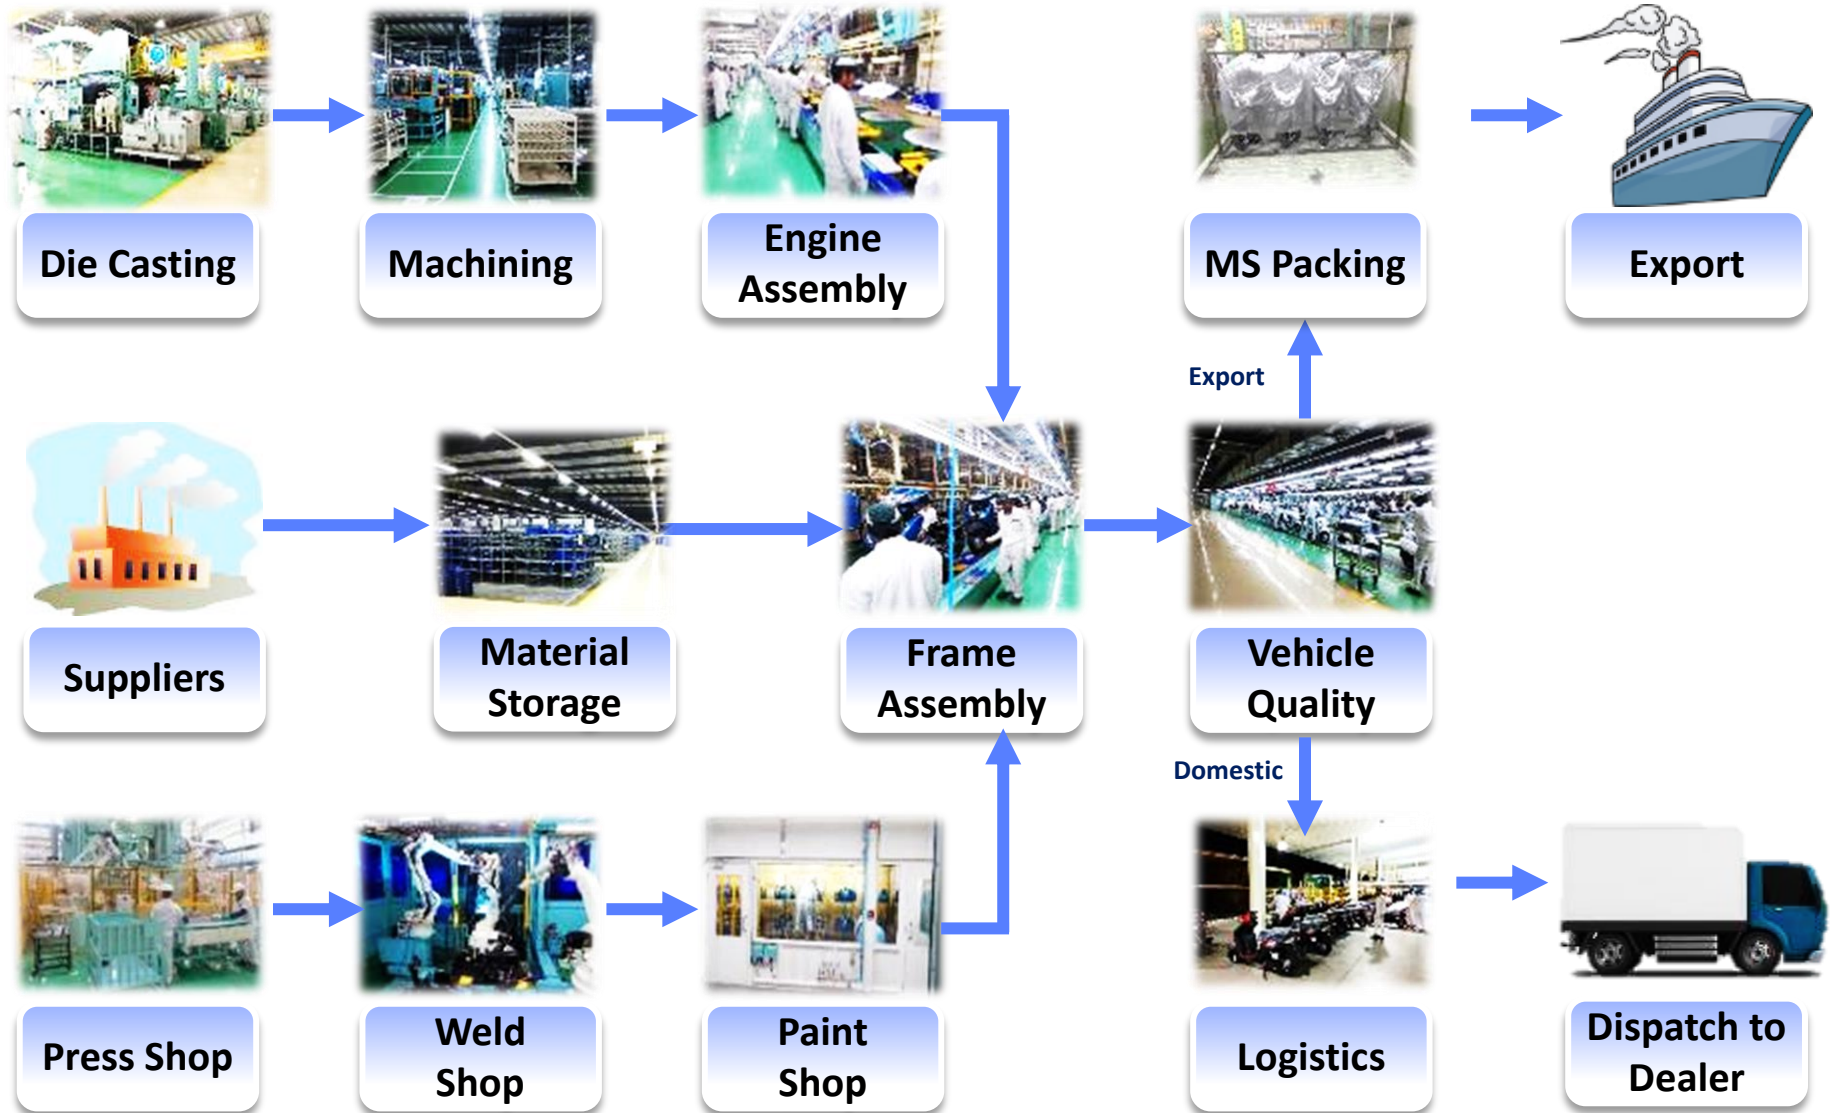

2017 - 2020

Product Technology Enhancements

Right now we are producing best quality product to considering environment factor

**All product after quality testing goes to market through logistic**

### Grid Electricity

Sanctioned Load: 14.5MVA  
Yearly Elect. Units : 25 Mn Kwh

### Solar Electricity

Capacity : 7 MWp  
Yearly Elect. Generation : 10 Mn. Kwh

### Wind Electricity

Capacity : 4.7 MWp  
Yearly Elect. Generation : 11.7 Mn. Kwh

### Hybrid Electricity

Capacity : 4.2 MWp  
Yearly Elect. Generation : 6.3 Mn. Kwh

### LNG

Yearly Consumption : 2354 TOE

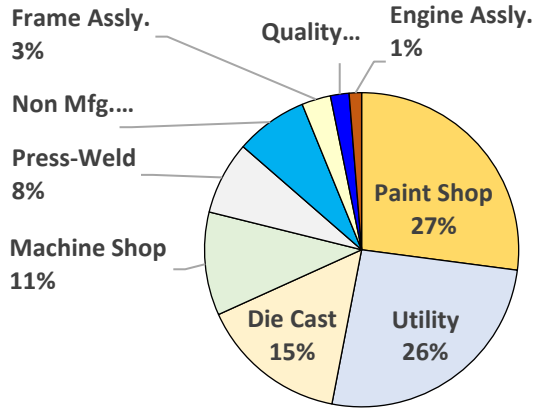

### Overall Energy Consumption

**Energy Consumption → 63% Electricity and 37% LNG**

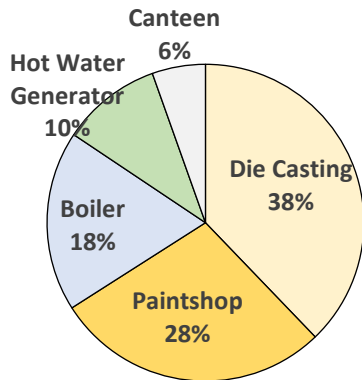

## Electricity Consumption

Yearly Elect. Consumption : 45 Million Kwh

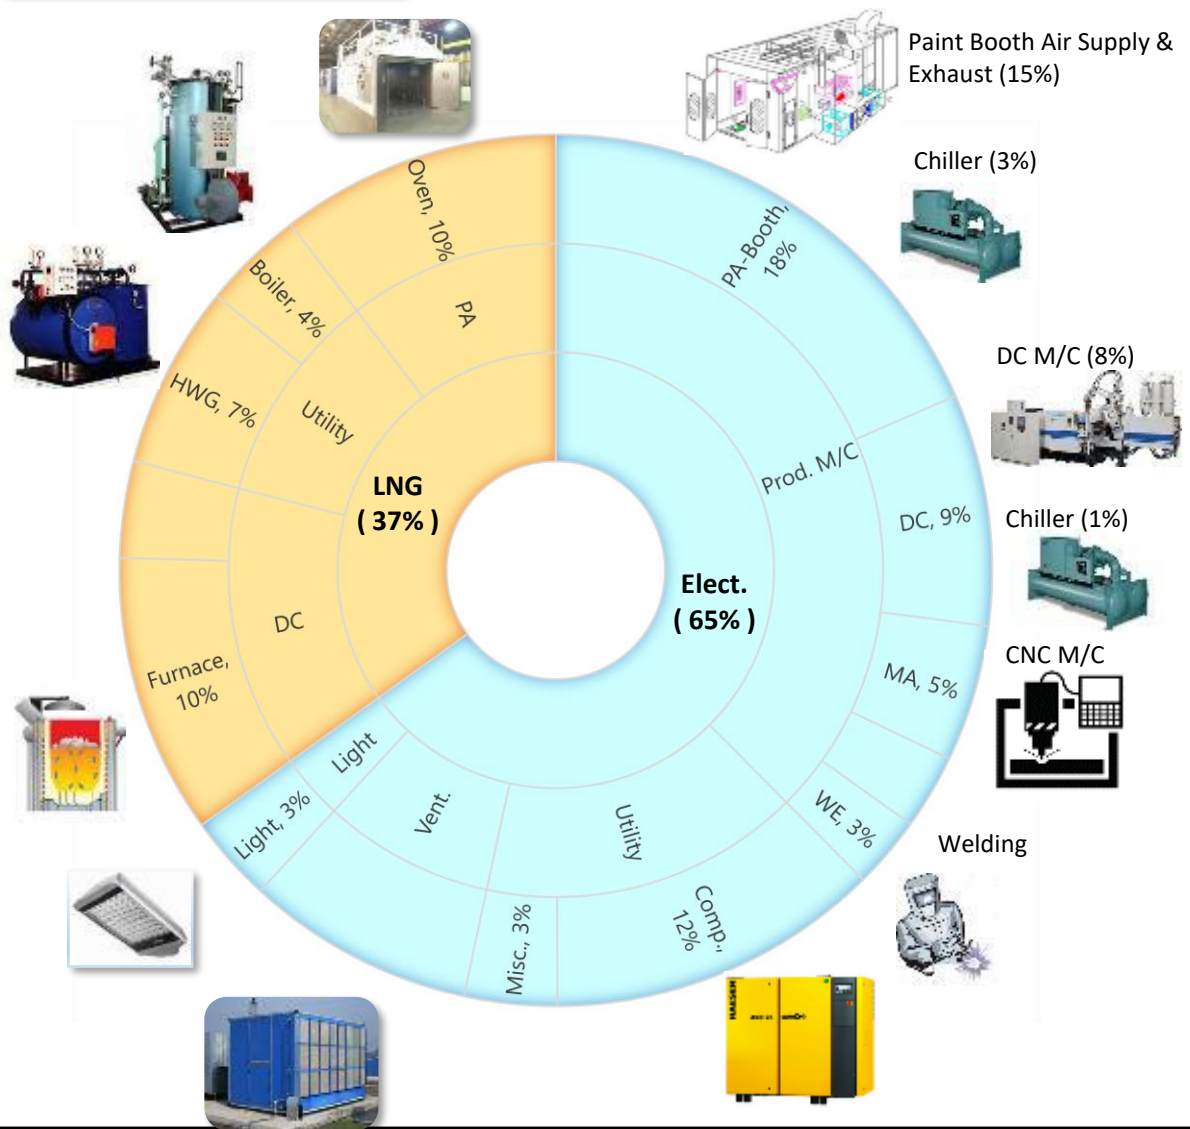

## LNG Consumption- Heating

Yearly Heat Consumption : 2,354 TOE

## Energy Consumption

Yearly Energy Consumption : 6223 TOE

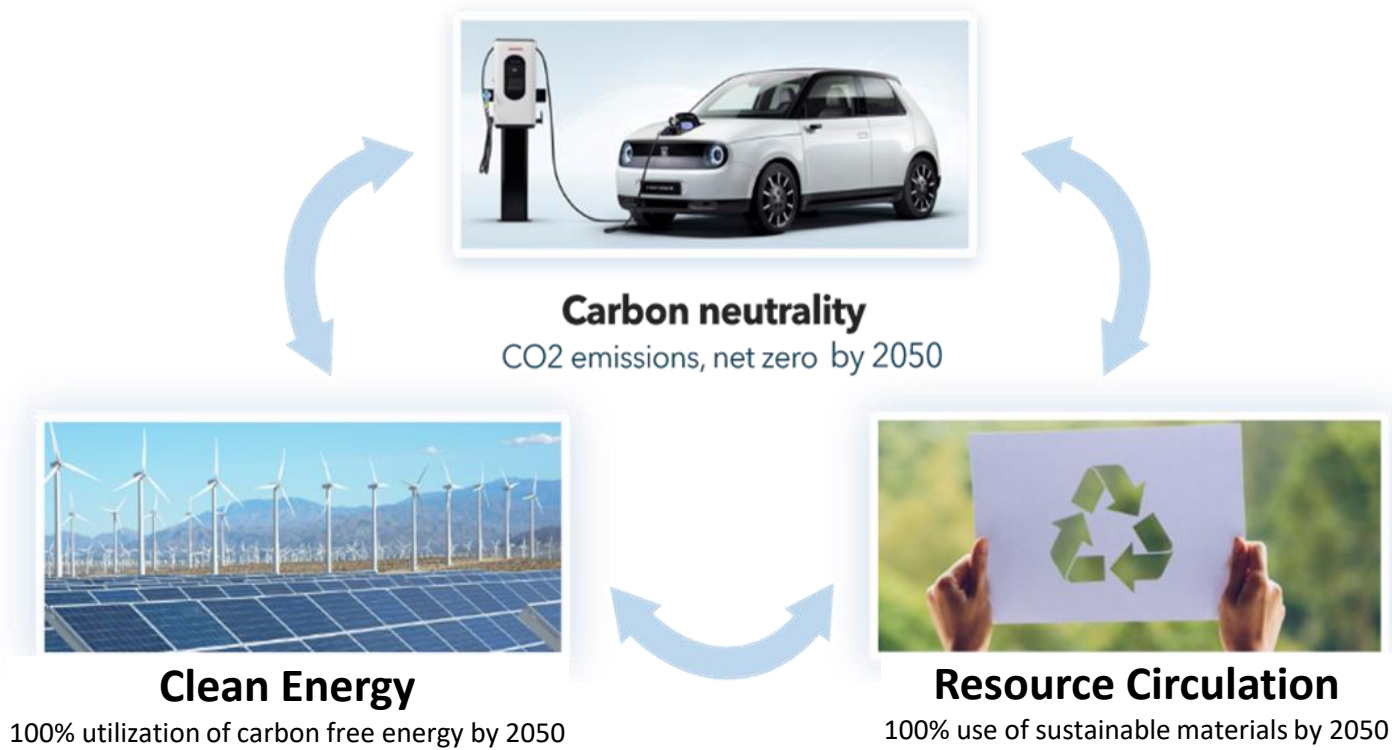

Major Energy Consumption → Paint Shop , Utility , Die-casting and Machin Shop

## Honda Environmental Vision

Strive for a sustainable and circular society that aims for  
“ zero environmental impact ”

### Triple Action to ZERO

## SEC Plan

2017-19	2019-20	2020-21	2021-22	2022-23
<p><b>Waste Heat Recovery</b> (LNG Saving: 2500 m3/day)</p> <p><b>Installation of small Compressor</b> 1.0 Rs/V</p> <p><b>[Small Com. on Off Days]</b></p>	<p><b>Heat Pump</b> (LNG Saving: 550 m3/day) Waste Heat from DC/M/C</p> <p><b>AC Automation</b> (Elect Saving : 269 / day)</p>	<p><b>Membrane Distillation</b> (LNG Saving: 1350 m3/ day) Reject of RO3 in ZLD Heated by Waste Heat</p> <p><b>Auto Tube Cleaner in Chiller</b></p>	<p><b>Centrifugal Comp.</b></p> <p><b>Smart Kitchen Vessel</b></p> <p><b>Wind Turbine</b></p>	<p><b>EC Fan in Air Washer</b></p> <p><b>Solar Dish Project</b></p>
<p><b>Renewable Energy</b></p> <p>5 MW, 2.0 MW, 2.0 MW, 2.7 MW, 2.0 MW, 2.7 MW</p>				
<p><b>Strive to be Benchmark</b></p> <ul style="list-style-type: none"> <li>Recycle Waste Energy up to maximum Potential</li> <li>Control of Potential Energy Wastage Area</li> <li>Control and Optimize Energy Consumption in Prod. M/Cs</li> </ul>				

Improvement in Energy Efficiency by 3R Principle

## Factory wise Change Process

Process	1F	2F	3F	4F

CO<sub>2</sub> Emission : 39 kg/veh  
 Water Consumption : 0.21 KL/veh  
 VOC Emission : 170 gm/m<sup>2</sup>  
 Waste Generation : 5.2 kg/veh

## Reduce Consumption

## 2019-20

**Waste Heat Rec.** **Heat Pumps**

**Sky pipe light**

**Roof Top Solar Panel**

**Use of River Water**

**Blank Size Red.**

**Co-processing of Waste**

**Waste Thinner Recovery**

CO<sub>2</sub> Emission : 33 kg/veh  
 Water Consumption : 0.19 KL/veh  
 VOC Emission : 163 gm/m<sup>2</sup>  
 Waste Generation : 4.6 kg/veh

## Reuse / Recycle

## 2020-21

**Solar Heater** **Solar Sludge Drying**

**Solar Dishes for Hot water Generator**

**Wind Power PPA**

**Green Factory Certification**

**Thermal Energy Storage System**

CO<sub>2</sub> Emission : 19 kg/veh  
 Water Consumption : 0.15 KL/veh  
 VOC Emission : 160 gm/m<sup>2</sup>  
 Waste Generation : 4.4 kg/veh

## Replace by RE source

## 2021-22

**Rain Water Recharge**

**Bio-composting of Organic Waste**

**Green Earth**

**"Leave blue skies for our children"**

Soichiro Honda, 1966  
 Founder, Honda Motor Co. Ltd.

CO<sub>2</sub> Emission : 14 kg/veh  
 Water Consumption : 0.08 KL/veh  
 VOC Emission : 158 gm/m<sup>2</sup>  
 Waste Generation : 4.3 kg/veh

## Replenish Resources

We have planned to achieve Global Honda Environment Commitment 2050 target

## Investment Projects

S.n.	Project Name	Year	Elect. Saving (Kwh / Yr)	LNG Saving (m3/ Yr)	Cost Saving (Mn Rs/ Year)	CO <sub>2</sub> Reduction (MT/Yr)	Investment (Million INR)	Payback (ROI)

## Situation Analysis

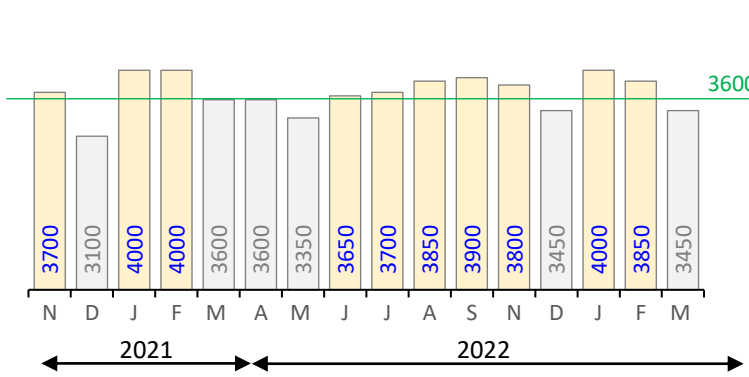

### SPC line current capacity (veh)

1 V/hg

Capacity- 3600 vehicles (6 shift)

### SPC line prod volume (Activa 110 + Activa 125) – Production

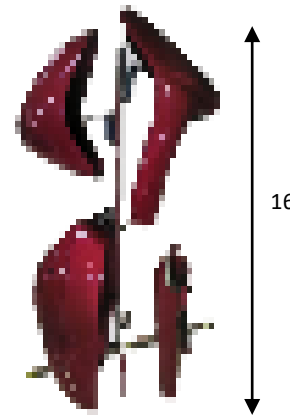

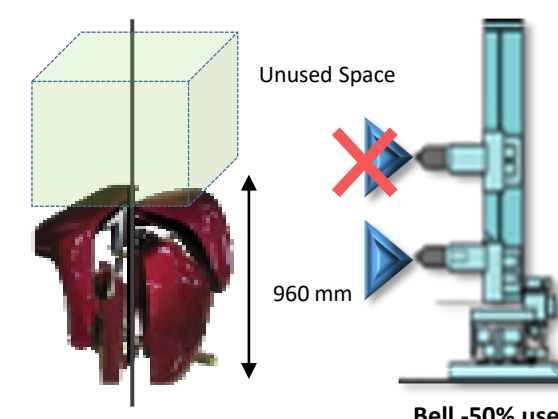

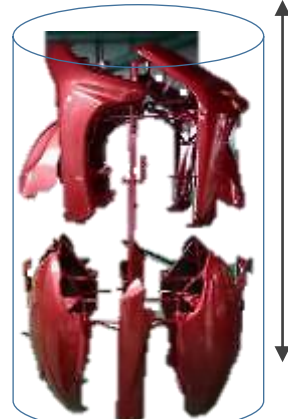

Sales demand high during festive season

### In order to achieve Peak production

Cat.	Concern / Challenges
E	<ul style="list-style-type: none"> <li>➤ High Energy Consumption</li> <li>➤ Generation of waste</li> </ul>
Q	<ul style="list-style-type: none"> <li>➤ Less time for preventive maintenance</li> <li>➤ Dust generation → Booth pit &amp; water curtain cleaning time NA</li> </ul>
M	<ul style="list-style-type: none"> <li>➤ Daily overtime – 175 man hr. (C-shift)</li> </ul>

Need to increase SPC capacity

## Idea generation

Year	2016-17	2018 - 19	2021-22
Loading Pattern	<p>KWP &amp; K24</p>  <p>1670 mm</p> <p>1 Veh / hgr</p> <p>Global Honda concept- Same as 3F</p>	<p>KWP &amp; K24</p>  <p>Unused Space</p> <p>960 mm</p> <p>Bell -50% use</p> <p>1 Veh / hgr</p> <p>CR Theme : T.E 30% to 38%</p>	<p>KOL &amp; KOP</p>  <p>1620 mm</p> <p>2 Veh / hgr</p>

## SPC line part loading capacity doubled...

## Carbon Footprint

Daily KWh consumption

KWh saving /day	740 KWh
KWh saving/yr.	2,00,000 KWh
Carbon emission reduced /Yr.	1,43,200 kg/Yr.
	149 Ton /Yr.

**149 Ton/Yr.**

## Water Saving

Daily Water consumption in ASU - KL

Water /day - ASU	8 KL/day
Water/yr. -ASU	2160 KL
Water/Yr. - Primer	520 KL
Water/Yr. – Sludge Pit	240 KL
Total	2920 KL

**2920 KL /Yr.**

## VOC 's reduction

Paint Shop VOC – Gm/m<sup>2</sup> (Before)

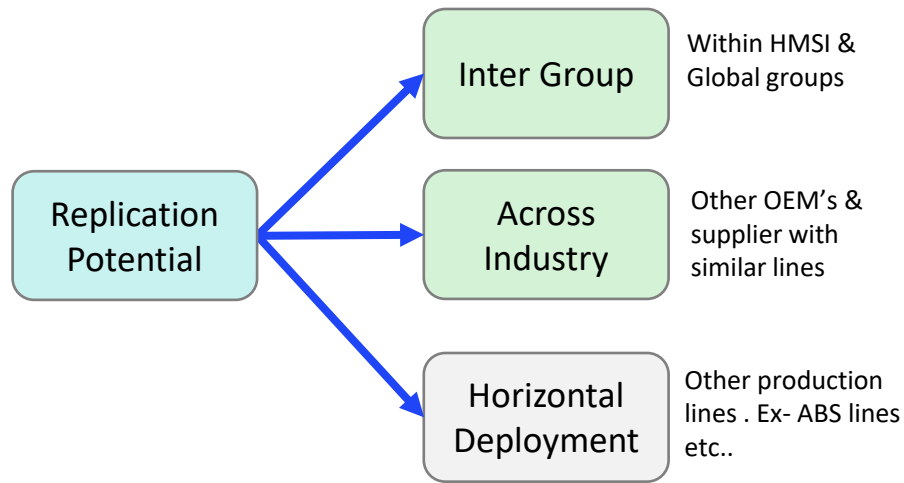

Paint Shop VOC – Gm/m<sup>2</sup> (After)

**3 gm/m<sup>2</sup>**  
(Till now)

**Significant positive environment impact by reduction in all key aspects...**

## Potential Areas

## Inter Group

### HMSI Factories India ( Shared via HMSI BUKAI function)

1F-Manesar	2F-Tapukara	3F-Narsapura	4F - Vithalapur
NA	Applicable	Applicable	●

### Global Honda Group's [ Shared via A&O PAPO BUKAI meeting]

Indonesia	Vietnam	Thailand	Philippines	Bangladesh

## Across Industry

Feasibility can be checked across other OEM's with similar parts

- ❖ Similar scooter models across OEM's in India
- ❖ All models have similar sheet metal parts
- ❖ Feasibility for painting pattern in 2 veh/hg condition can be checked

## Horizontal- Other Lines

Taking Cue from success of this project, we have now targeted ABS lines (Plastic parts) for similar concept implementation...

Veh/hg - 2.5

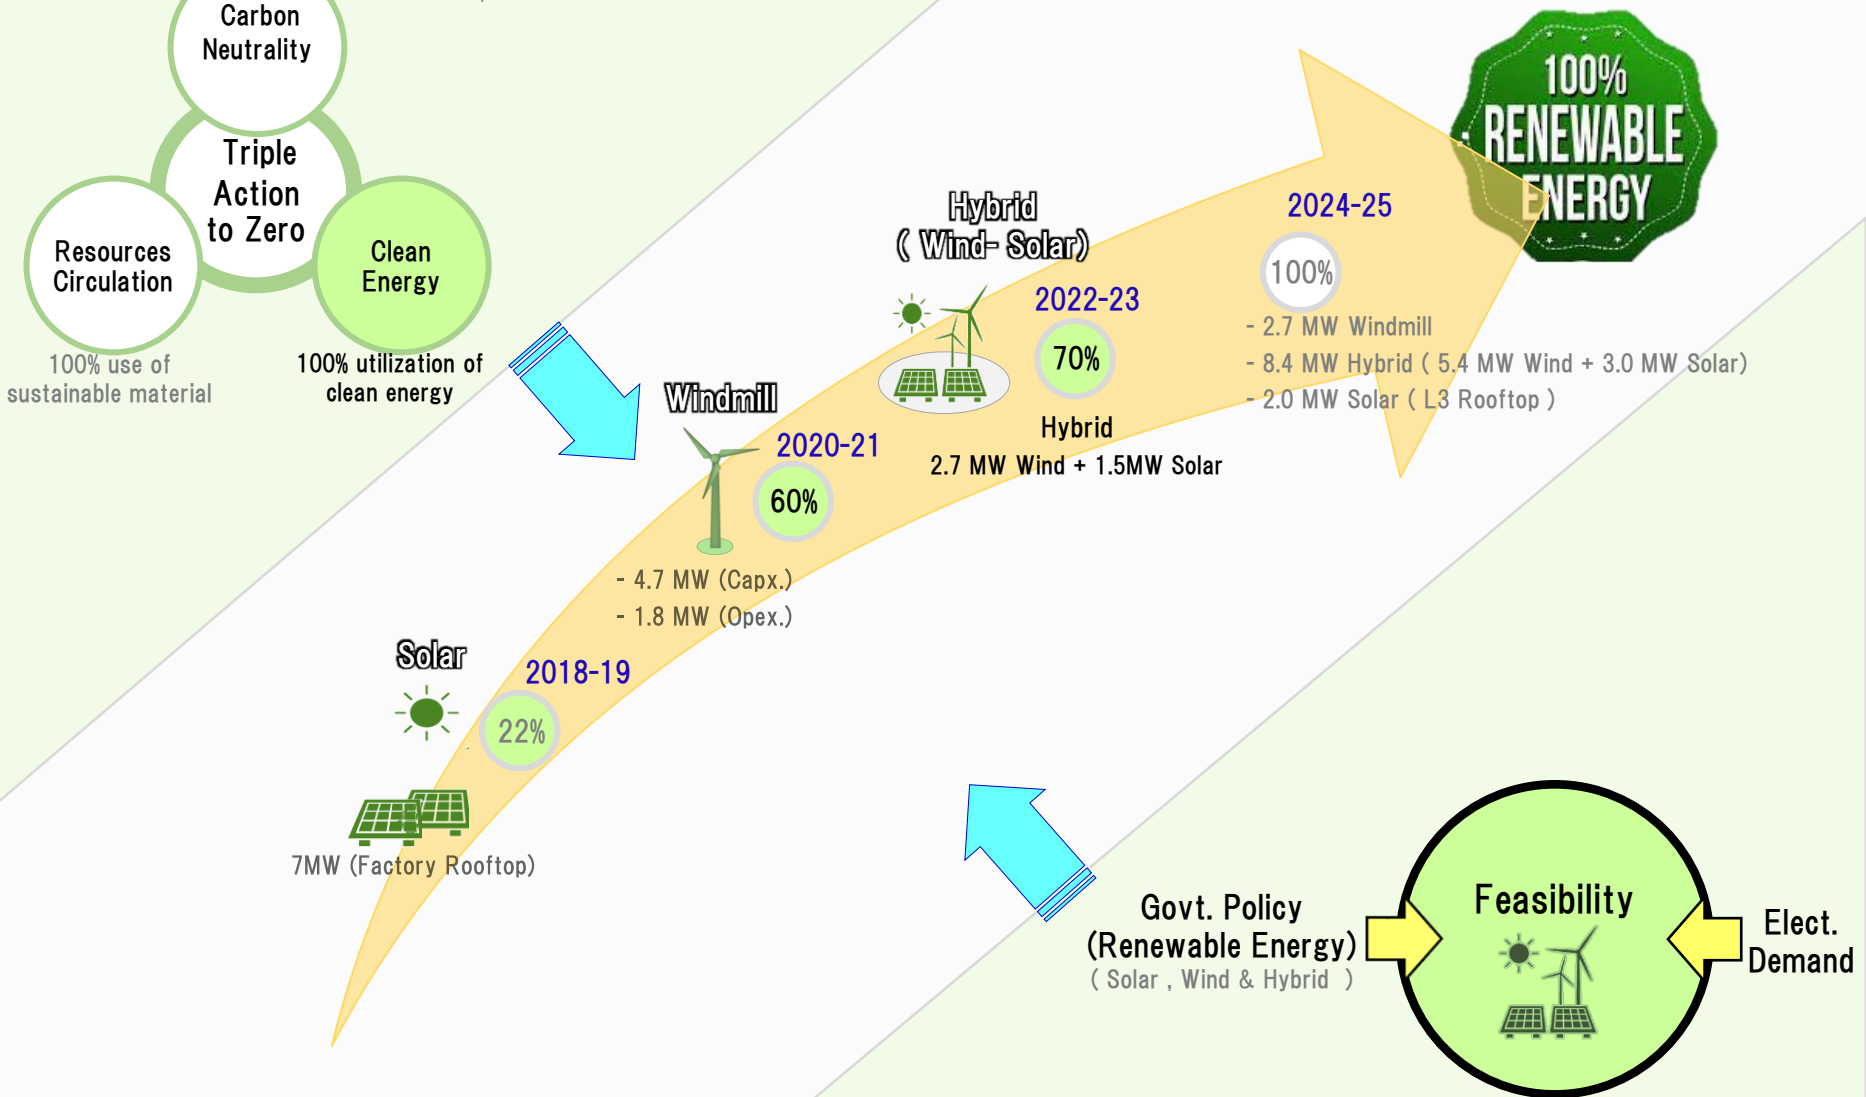

Veh/hg - 4.0

## Honda Environmental Vision

## Clean Energy

100% utilization of carbon free energy by 2050

**Renewable Energy Target 70% till 2023**

## 5 MWp Solar Power Plant

- ☐ Installation Date : Sep'18
- ☐ Roof Area : 40,000 Sq m
- ☐ Annual Elect. Generation : 72 Lac Kwh
- ☐ Power Generation Voltage : 480V
- ☐ Power Evacuation : 11kV

## 2 MWp Solar Power Plant

- ☐ Installation Date : Jul'19
- ☐ Roof Area : 16,000 Sq m
- ☐ Annual Elect. Generation : 23 Lac Kwh
- ☐ Power Generation Voltage : 480V
- ☐ Power Evacuation : 415 V

Solar plant Power Generation Trend-7MW

Yearly Electricity :95 Lac Kwh

Solar Generation 95 Lac kWh/ Year

## 2 MWp Wind Power Plant

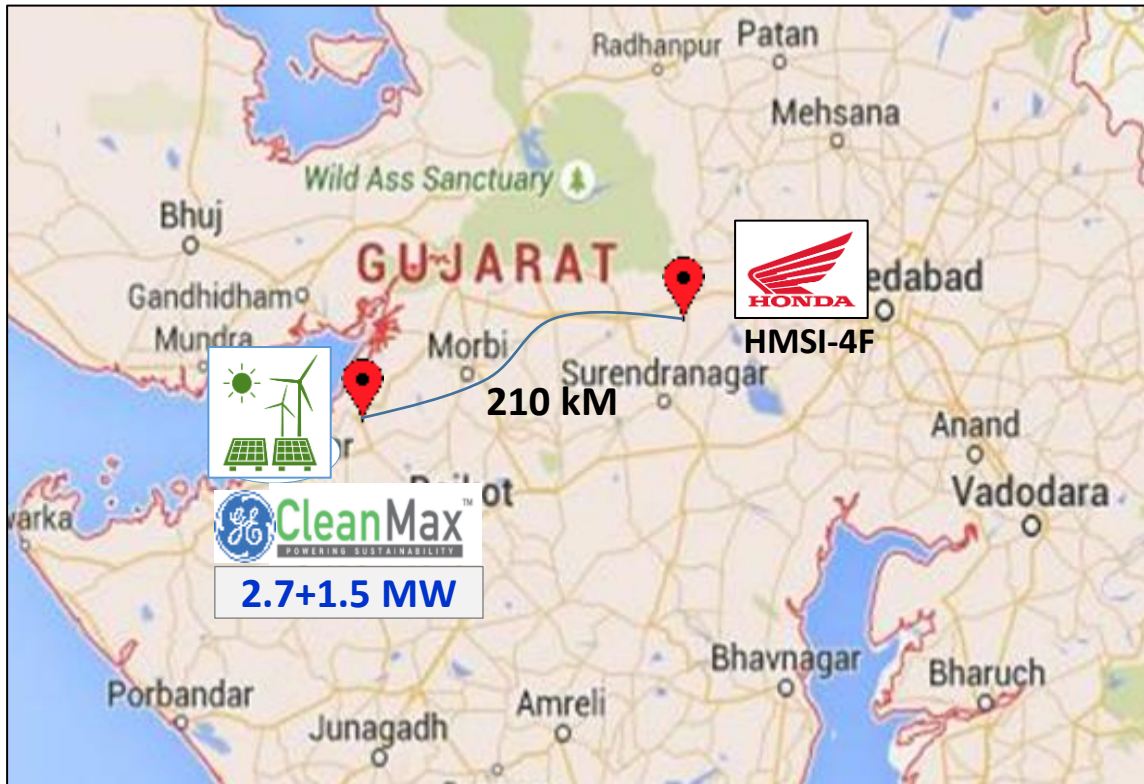

- Installation Date : Jun'20
- Project Location : Patan
- Annual Elect. Generation : 42 Lac Kwh
- CO2 Reduction : 3,133 TON

## 2.7 MWp Wind Power Plant

- Installation Date : Sep'21
- Project Location : Dwarka
- Annual Elect. Generation : 75 Lac Kwh
- CO2 Reduction : 5,595 TON

**Windmill Generation 117 Lac kWh / Year**

## 2.7 +1.5 MWp Wind-Solar Hybrid project

- ☐ Installation Date : Mar'23
- ☐ Project Location : Jamnagar
- ☐ Annual Elect. Generation : 100 Lac Kwh
- ☐ CO2 Reduction : 7,222 TON

Plan Generation trend of Hybrid Project

**Wind-Solar Hybrid project Generation 100 Lac kWh / Year**

# HMSI ENVIRONMENT POLICY

As responsible members of society and industry, we Honda Motorcycle and Scooter India Pvt. Ltd. (HMSI), manufacturer of two wheelers, recognize that well being of human and conservation of earth's environment is important. By adopting Environment Management System, HMSI is fast moving towards realization of Honda's Green Factory Concept.

We shall endeavour to continually monitor, improve and conserve the environment in which we operate. HMSI is committed to achieve, environmental excellence in all its activities related to products & services in the following ways.

- Conserving and protecting the environment by preventing pollution at its source of generation and strengthening our existing pollution control system.
- Promote activities for reduction of water consumption, CO2 emission and usage of renewable energy for conservation of resources such as electricity, water and fuels.
- Adopting 3 R principle – Reduce, Reuse & Recycle in all processes thus minimizing waste generation.
- Fulfil all applicable legal / regulatory requirements and compliance obligations and strive to go beyond wherever possible.
- Regular monitoring and reviewing of environmental objectives and take actions to achieve the intended outcomes of Environment Management System.
- Encourage sustainable resource usage, climate change mitigation, adaptation and protection of ecosystems.
- Increasing environment awareness and competence amongst our employees and encourage vendors, suppliers, dealers and other stake holders to adopt Environment Management System.

HMSI will continually improve its environmental management system following PDCA cycle to make it more effective. The policy will be well communicated to our employees as well as persons working on our behalf and to the general public.

Date : 01-11-2017  
Place: Gurugram

Promote activities for reduction of Waste

President & C.E.O

## Waste Generation Trend

Waste Recycling Scenario (MT)

## Major Waste Reduction Activities

### Co-processing of Incineration Waste

Reuse : 700 MT/Year

### AI. recovery in DC

Recovery : 39 MT/Year

### Sheet Metal Blank Size Reduction

Red. : 800 MT/Year

### Sludge Drying

Recovery : 100 MT/Year

### Bio-composting of Organic Waste

Reuse : 144 MT/Year

### Avoid Single Use Plastic in packing

Reuse : 10 MT/Year

## VOC Emission Trend

VOC Emission (gm/m<sup>2</sup>)

### Waste Thinner Recovery

Impact : 4 gm/m<sup>2</sup>

### Primer less Technology

Impact : 3 gm/m<sup>2</sup>

## Major VOC Reduction Activities

### Mono-coat System

Matt Finish 2 gm/m<sup>2</sup>

### Mono-coat System

Shine Finish 2 gm/m<sup>2</sup>

### Improve Bell cup eff.

Impact : 1 gm/m<sup>2</sup>

**Aiming 100% recycling of both hazardous & non-hazardous waste with zero waste to landfilling**

## Sources

Scope 1 (Fuel resources)	Scope 2 (Grid supply)	Scope 3 (Waste disposal & suppliers)	Total (Scope 1,2 & 3)
Fuel consumption	Grid supply	Waste disposal, employee commute, Dealer & Suppliers end	1,50,295 Ton
15,750 Ton	70,841 Ton	63,704 Ton	

**Total CO<sub>2</sub> emission from Scope 1, 2 & 3 is 1,50,295 Ton for the period of Last 3 Years**

Our leaders opting car pooling instead of their individuals cars

Key Project Results:

14 Cars were not used out of 26 Cars

Distance from Ahmedabad to Vithalapur: **80 Km**  
**2240 Km's** usage saved everyday

150 Ltrs. of Petrol saved

**424 Kg's** of CO2 emission saved everyday (**114 Ton** CO2 saved per annum)

Daily 70 Kms saved due to club of Kalol bus with Kadi bus used for employee commute

18,200 Kms reduced per year.

**37.03 Kg's** of CO2 emission saved everyday (**9.62 Ton** CO2 saved per annum)

**They have done their bit for a greener future!!!**

BLUE SKIES FOR OUR CHILDREN

## ☐ Green supply chain commitment

## HMSI ENVIRONMENT POLICY

As responsible members of society and industry, we Honda Motorcycle and Scooter India Pvt. Ltd. (HMSI), manufacturer of two wheelers, recognize that well being of human and conservation of earth's environment is important. By adopting Environment Management System, HMSI is fast moving towards realization of Honda's Green Factory Concept.

We shall endeavour to continually monitor, improve and conserve the environment in which we operate. HMSI is committed to achieve, environmental excellence in all its activities related to products & services in the following ways.

- Conserving and protecting the environment by preventing pollution at its source of generation and strengthening our existing pollution control system.
- Promote activities for reduction of water consumption, CO2 emission and usage of renewable energy for conservation of resources such as electricity, water and fuels.
- Adopting 3 R principle – Reduce, Reuse & Recycle in all processes thus minimizing waste generation.
- Fulfil all applicable legal / regulatory requirements and compliance obligations and strive to go beyond wherever possible.
- Regular monitoring and reviewing of environmental objectives and take actions to achieve the intended outcomes of Environment Management System.
- Encourage sustainable resource usage, climate change mitigation, adaptation and protection of ecosystems.
- Increasing environment awareness and competence amongst our employees and encourage vendors, suppliers, dealers and other stake holders to adopt Environment Management System.

HMSI will continually improve its environmental management system following PDCA cycle to make it more effective. The policy will be well communicated to our employees as well as persons working on our behalf and to the general public.

Date : 01-11-2017  
Place: Gurugram

  
 President & C.E.O

## ☐ Honda Green Purchase Policy

### II. Honda Green Purchasing Policy

For Honda, activities to conserve the global environment establish an important pillar in our corporate policies. Our goal is to reduce our environmental footprint over the entire life cycle of our products, from product development to purchasing, production, administration, transportation, and to sales and recycling.

To carry out these activities effectively, we are continuing to take strong measures to reduce our environmental footprint in each area, together with our suppliers. We are also adding E (Environment) to our supplier evaluation categories <sup>(1)</sup> of Q (Quality), C (Cost), D (Delivery) and D (Development) to allow us to more actively encourage purchasing environmentally friendly parts and materials.

Below is a list of the individual areas in Honda green purchasing activities.

- Environmental management activities to ensure environmental control for products (parts and materials) and corporate activities
- Corporate activities <sup>(2)</sup> to supply these products (parts and materials) (Development, Purchasing, Production, Administration, Transportation, Sales, Recycling)
- Products (parts and materials, etc.) purchased by Honda

Collectively, these are referred to as the areas of our environmental activities.

For each area, the overall purchasing activities of sharing policies with suppliers and achieving targets together are called Honda green purchasing activities.

<sup>(1)</sup> The results of activities at each supplier in response to these guidelines may be evaluated.

<sup>(2)</sup> Corporate activities cover all activities related to Honda products (including not only first-tier but also sub-tier suppliers).

**Target setting done for supplier's awareness improvement**

## CO2 Reduction Guidelines

**Objective:**  
Reduce the **Global Warming** through energy saving initiatives.

**Reduction Target @ 1% Per Year**

## FY22-23 Activities Schedule

Major Activities	Unit	Tgt. Date	Status
Splr Selection for 95ki activities <4F>	4 Splrs	Aug'22	○
Slimoffice Nomination <HO Drive> (Representative & Approver)	55 Splrs	Oct'22	○
Slimoffice Registration & User id distribution <HO Drive>	55 Splrs	May'22	○
Training & Target Explanation	New Splrs / Person change	Jun'22	○
Splrs 96ki CO2 Data Collection <4F> • To calculate CO2 Reduction of 94ki as per ASH/HM Japan guideline)	23 Plan / 23 Actual	Mar'23	○
Environment Award 95ki <HO Drive> • On the basis of Suppliers GHG Rating	8 Plan / 8 Actual	Feb'23	○

## Examples of CO2 Reduction Kaizens

**IGBT Type Rectifier**

**PNG Melting Furnace**

**Co2 Main Line loop closed**

**Energy Efficient Compressor**

**CO2 Reduction activities are in progress as per ASH / HM Japan Guidelines**

## ❑ Corrugation Box Reduction

## ❑ FY 22-23 Activities Schedule

**Objective:**  
Reduce the **Paper Use** through Corrugation Packing reduction

**Reduction Target @ 1% Per Year**  
**Target Area :**

Major Activities	Unit	Tgt. Date	Status				
Splr/Part Selection for 99ki activities <4F>	4 Splrs	April'22	○				
Training & Target Explanation	4 Splrs	Jun'22	○				
Splrs 99ki Corrugation Box use Data Collection <4F> • To be used as base for next years	<table border="1"> <tr> <td style="background-color: #FFD700;">4</td> <td style="background-color: #00FF00;">4</td> </tr> <tr> <td>Plan</td> <td>Actual</td> </tr> </table>	4	4	Plan	Actual	Mar'23	○
4	4						
Plan	Actual						

## ❑ Examples of Corrugation Box use Reduction

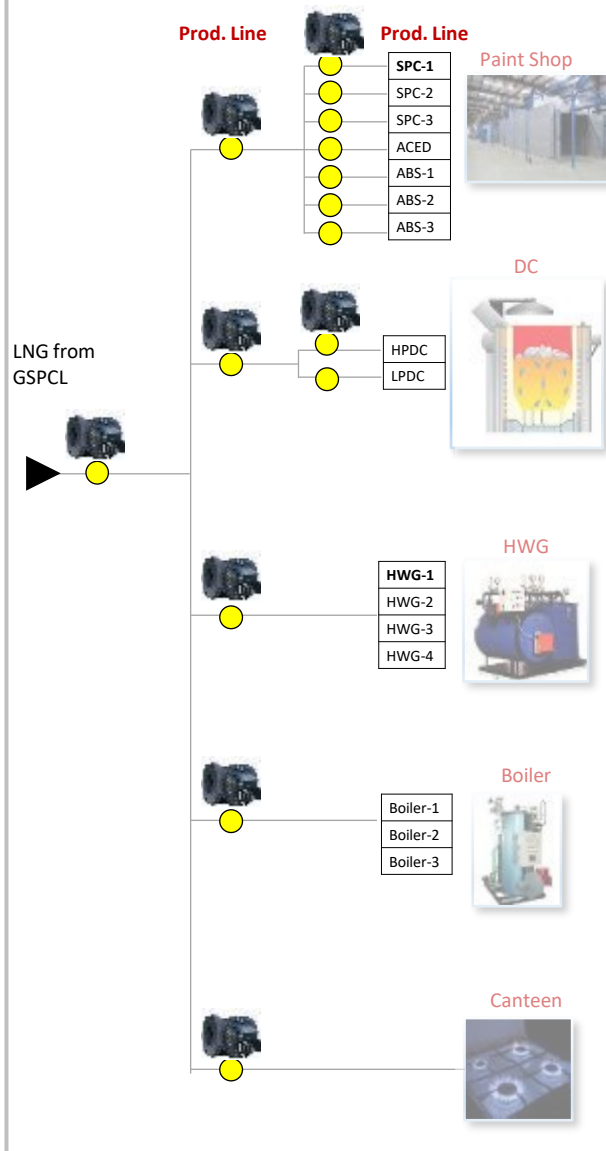

**Corrugation Box use reduction is in progress**

### Suggestions

Sr no.	Summary	Saving Kwh /Yr.	Invest. (Rs)	Status
1	Use the Sludge pool booth water curtain line to primer zone water curtain	1,63,943	10,000	Done
2	Hydraulic Motor keep Off while no operation in machine in ideal condition	89,438	-	Done
3	Convert Booth inside tube lights into LED lights.	89,424	20,000	Done
4	Overhead light required timer .	62,928	10,000	Done
5	Providing the VFD & control the frequency of UF Module Circulation pump.	45,954	-	Done
6	Paint shop's many area are having halogen light that need to replace with LED light	35,770	2,00,000	Done
7	Timer to be installed in Meeting room(2 nos.),Training room(1 Nos.),Office(3 nos.).	28,980	30,000	Done
8	DC maintenance required separate lighting switch to control.	16,560	-	Done
9	Electricity Saving in meeting room by OFF the AC between 2:30-03:30pm.	15,456	-	Done
10	Energy saving by separating CKD/CBU lights with rest MS area lights.	13,116	-	Done
11	Timer based ON/OFF of press shop over head lights.	12,420	-	Done
12	PPBS and inspection area lights are getting on in day time ,timer need to install.	10,201	-	Done
13	Required separate control of lighting in HPDC and LPDC RFD area.	8,280	-	Done
14	Lighting in deburring room controlled with timer.	7,154	10,000	Done
15	Energy Saving by separating marshal loading single lights with rest MS area.	5,299	-	Done
16	Timer based auto ON/OFF of over head lights in BOP trolley storage area.	4,968	10,000	Done
17	Light separation in tool room, Training Island area.	4,928	-	Done
18	Timer based auto ON/OFF of lights in Gas bank area.	1,060	-	Done
19	Lighting Pattern to be change in QC/EQ Lab.	848	-	Done
20	Power save when machine not in use. Separate socket for LPDC machine.	199	-	Done
21	Pool cord in reception area lighting.	1,303	-	In process
22	(B1 to B2) shift time auto stopping Drive motor of Conveyors.	-	-	In process
23	To reduce the elect. consumption by Tube lights connection separation in DC & MA	-	-	In process
24	To reduce the electricity consumption in Fume Exhaust System by installing timer	-	-	In process
25	Energy saving by increase natural light installing in weld shop	-	-	In process
26	Energy saving by control air leakages in weld shop	-	-	In process
27	Power saving by reducing the ASU & Exhaust fan frequency during Lunch break.	-	-	In process
<b>Total</b>		<b>6,18,230</b>	<b>2,90,000</b>

Award 2021 -1st Prize</b></p>	<p><b>CII Excellence in Renewable Management Awards 2022</b></p>	<p><b>12th Exceed Environment Management Award 2022</b></p>
						

## Achievement

### Zero Waste to Landfill

Co-processing instead of landfill/ incineration of

- Paint Sludge
- Jig Stripping Sludge
- ETP Sludge
- Phosphate Sludge

### Zero Ground Water Use

Using only river water & now started using rain water for industrial as well as domestic purpose

### 70% CO<sub>2</sub> reduction in last 5 year by

- 7 MW solar power
- 6 MW Wind Power
- Heat Recovery
- Energy Efficiency Improve

### 38% Green Cover inside plant

- 43,412 m<sup>2</sup> Tree Plant
- 13,699 m<sup>2</sup> Hedge Plant
- 11,830 m<sup>2</sup> Shrubbery Plant
- 70,959 m<sup>2</sup> Lawn Area

**Many award and achievement by 4F to show case how we care of environment**
